Nym

Protecting user privacy at the network and application levels, using mixnets and threshold credential systems.

README.md

Open-source, cross-platform VPN client built with Rust that provides true privacy through decentralized mixnet technology and multi-hop censorship-resistant WireGuard tunneling. 🚀 What is NymVPN

NymVPN is a privacy-focused, decentralized VPN application that goes beyond traditional VPNs by leveraging:

```
🔀 Mixnet Technology: Anonymous 5-hop routing through Nym's decentralized
network
⚡ WireGuard + AmneziaWG: Fast, secure tunneling with built-in censorship
resistance
🛡️ Metadata Protection: Unlike traditional VPNs, protects both content AND
traffic patterns (in mixnet mode)
🔐 Zero-Knowledge Credentials: Private authentication using zero-knowledge
zk-nyms
🌍 No Single Point of Failure: Fully decentralized infrastructure
```

Pinned

nym Public

Nym provides strong network-level privacy against sophisticated end-to-end attackers, and anonymous transactions using blinded, re-randomizable, decentralized credentials.

Rust 1.7k 265

nym-vpn-client Public

Cross-platform open source VPN client built in Rust, with mixnet anonymity and WireGuard speed. Protects metadata, not just IP addresses. Zero-knowledge payments for unlinkable online activities.

Rust 386 39

sphinx Public

A Sphinx implementation in Rust

Rust 284 27

nyxd Public

Fork of https://github.com/CosmWasm/wasmd for Nyx validators
